STATISTICAL APPLICATIONS

OIC Statistics Database (OICStat)

The **OIC Statistics (OICStat) Database** is the first and only international official statistics repository on the Member Countries of the Organisation of Islamic Cooperation (OIC). Enriched with the experience drawn from its predecessor Basic Social and Economic Indicators (BASEIND) Database, **OICStat** is periodically maintained to ensure the dissemination of most up-to-date through the inclusion of categories and indicators on the OIC Member Countries.

Equipped with more "**user-friendly**" features, OICStat currently hosts 379 indicators under 22 categories dating back to 1985.

To ensure data completeness and methodological comparability among the OIC Member Countries and the to-be-introduced aggregate groups, OIC-Stat currently presents data on OIC Member Countries extracted from databases of officially recognized international organisations including Food and Agriculture Organization (FAO), International Labour Organization (ILO), International Monetary Fund (IMF), International Telecommunication Union (ITU), Organization of Petroleum Exporting Countries (OPEC), Organization for Economic Cooperation and Development (OECD), United Nations Educational, Scientific and Cultural Organization Institute for Statistics (UNESCO, UIS), United Nations Population Division (UNPD), United Nations Statistical Division (UNSD), World Bank, World Health Organization (WHO) and World Tourism Organization (UNWTO).
